

Cement & Concrete Composites

Editor

PROF. R. N. SWAMY

Department of Mechanical and Process Engineering, University of Sheffield, Mappin Street, Sheffield S1 3JD, UK

Associate Editor

PROF. A. E. NAAMAN

Department of Civil Engineering, 2340 GG Brown Building, The University of Michigan, Ann Arbor, Michigan 48109-2125, USA

Editorial Board

P.-C. Aitchin

Université de Sherbrooke, Quebec, Canada

L. K. Aggarwal

Central Building Research Institute,
Roorkee, UP, India

P. Balaguru

Rutgers University, Piscataway, New Jersey,
USA

B. I. G. Barr

University of Wales, Cardiff, UK

A. Bentur

National Building Research Institute,
Haifa, Israel

A. M. Brandt

Institute of Fundamental Technology Research,
Warsaw, Poland

T. W. Bremner

University of New Brunswick, Fredericton,
New Brunswick, Canada

K. Ghavami

Pontificia Universidade Catolica do
Rio de Janeiro, Gavea, Brazil

O. E. Gjorv

University of Trondheim, Trondheim, Norway

B. P. Hughes

University of Birmingham, Birmingham, UK

S. K. Kaushik

Indian Concrete Institute, Madras, India

M. Kawamura

Kanazawa University, Kanazawa, Japan

W. W. Lin

Zhejiang University, Hangzhou,
People's Republic of China

V. M. Malhotra

CANMET, Ottawa, Ontario, Canada

F. Massazza

Italcementi, Bergamo, Italy

P. J. M. Monteiro

University of California, Berkeley, USA

P. Paramasivam

National University of Singapore,
Kent Ridge, Singapore

A. Shayan

CSIRO, Highett, Victoria, Australia

T. Uomoto

University of Tokyo, Minato-ku, Japan

D. Van Gemert

KU Leuven, Heverlee, Belgium

M. L. Wang

The University of New Mexico, Albuquerque,
New Mexico, USA

S. Wei

Southeast University, Nanjing, P R China

This journal is designed to reflect current developments and advances being made in the general field of cement-concrete composites technology and in the production, use and performance of cement-based construction materials in general. The word cement is interpreted here in a wide sense to include not only portland cement but also other matrices such as composite cements, resins, polymers and sulphur. The journal will therefore cover a wide range of composite materials such as fibre cement concrete composites, polymer cement composites, polymer impregnated composites, ferrocement, resin concretes, lightweight concretes, wood composites, use of waste materials, composite cements, adhesion bonding and fibre reinforced plastics as applied to construction and material and structural composite systems. Original papers dealing with microstructure, material properties, testing and test methods, fracture mechanics, durability aspects, structural characteristics, composite mechanics technology, modelling, design, fabrication and practical applica-

tions of these materials will therefore form the major themes of the Journal. Papers dealing with structural behaviour, *in situ* performance and field studies will also be accepted as well as those dealing with the implications of energy conservation, thermal insulation, repair and maintenance costs and serviceability behaviour of structures made with these materials.

The Journal has, within the above context, several specific objectives. It wants to foster a better understanding of construction materials, provide a forum for unusual and unconventional materials, encourage the development of low cost energy-saving materials and bridge the gap between materials science, engineering performance, environmental effects, *in situ* behaviour, design/service life and construction. It is the intention of the Journal to have particular issues devoted to specific themes to focus attention on topical issues.

Hopefully, the Journal will provide a unifying basis to bring together material scientists, engineers, designers and fabricators.

SUBSCRIPTIONS 1996

One volume, six issues per volume (Volume 18). Annual Institutional Subscription Rates 1996: £295.00/US\$470.00. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA and from the Rest of the World to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. Subscription rates for Japan are available on request.
