Al-Khaiat, H. 123
 Alavie, T. 21
 An, X. 241
 Ansari, F. 3, 59
 Arya, V. 69
 Awal, A. S. M. A. 367

 Badanoiu, A. 295
 Barr, B. I. G. 329
 Bellemore, D. G. 45
 Bucea, L. 161

 Cao, H. T. 161
 Claus, R. O. 69
 Culshaw, B. 35

 Davis, M. A. 45
 de Vries, M. 69
 de Hanai, J. B. 359
 Di Maggio, R. 139
 Diamond, S. 391
 Ding, H. 59

 Feric, T. 301
 Franchini, M. 139
 French, W. J. 451
 Furlan Jr, S. 359

 Gao, J. 307
 Gareis, P. J. 341
 Georgescu, M. 295
 Gomez, W. 341
 Grattan-Bellew, P. E. 403
 Guerrini, G. 139
 Guha-Thakurta, A. 21

 Habel, W. R. 81
 Hadjiloucas, S. 35
 Haque, M. N. 123
 Hillemeier, B. 81
 Hills, C. 451
 Hofmann, D. 81
 Howarth, R. J. 451
 Huang, R. 131
 Hussin, M. W. 367

 Ishibashi, T. 193

 Karihaloo, B. L. 315
 Kersey, A. D. 45
 Konstantaki, M. 35
 Krolo, P. 301
 Krstulovic, R. 301

 Lange-Kornbak, D. 315

Keyword Index

AAR-paradoxes 441
 AAR-test parameters 441
 Accelerated tests 403, 451
 Acceptance criteria 451

Adsorption capabilities 301
 Aged infrastructures 373
 Air content 3
 Alkali 391
 Alkali-aggregate reactivity (AAR) 403
 Alkali-aggregate reaction (AAR) 441
 Alkali-silica reaction 367
 ASR 391, 415, 451
 Assessment 427

 Beams 351
 BET specific surface 295
 Blended cements 161
 Bonds strength 139
 Bragg gratings 3
 Bragg grating 21
 Bridge 21
 Bridge testing 3

 Carbon fiber 351
 Cement hydration 301
 CFRP (carbon fiber reinforced plastic) 21
 Chemical composition 161
 Chrysotile asbestos 301
 Collapse mechanisms 183–284
 Composite materials 3
 Compressive strength 123
 Computations 415
 Concrete 3, 21, 59, 285, 359
 Concrete mechanics 107
 Concrete structures 123
 Concrete durability 161
 Concrete beams 131
 Condition assessment 131
 Confining stress 149
 Corrosion thickness 131
 Crack tip opening displacement 3, 59
 Crack-opening displacement 59
 Cracking 59
 Cracks 3

 Damage assessment 81
 Damage 149
 Damage patterns 183–284
 Depth of carbonation 123
 Design codes 183–284
 Distributed sensors 3
 Distributed sensing 35
 Drying 391
 DSP 315
 Durability 285, 351

 Earthquake resistance 183–284
 Electrochemical test 131
 Embedded sensors 59
 Embedment in concrete 81
 Energy absorption 107

Index

- Engineered cementitious composites 373
- Environment 427
- Epoxy 351
- Evaluation 403
- Expansion 367

- Fabryperot sensor 3
- Failure plane 149
- Failure mechanism 149
- Fiber optic grating 21
- Fiber concrete testing 107
- Fiber reinforced concrete 3, 107, 359
- Fiber optics 45
- Fiber Bragg grating 45
- Fiber-optic sensors 59
- Fibers for 107
- Fibre reinforced mortars 315
- Fibre bridging stress 315
- Fibre pull-out 315
- Fibre-reinforced concrete 329,341
- Fibres 139
- Fibrillated polypropylene fibers 341
- Field measurements 212
- Flexural strength 307
- Flexural load 351
- Fracture mechanics 315
- Fracture tests 329
- Freeze-thaw tests 285

- Glass fiber reinforced plastic 3
- Glass fiber 351

- High strength concrete 3, 329
- Hot dry environment 123
- Hydration process 295
- Hydrogels 35
- Hydroxides 391
- Hyogoken — Nambu earthquake 183–284

- Impact loading 3
- Impact resistance 341
- Infrastructure 3
- Intensity sensors 3

- Interferometric sensors 3
- Lightweight concrete 307
- Lithium treatments 391
- Load capacity 131
- Localized sensors 3

- MDF cement 139
- Mechanics of 107
- Mechanics 415
- Microcracks 3, 59
- Microsilica 315
- Modelling 149
- Molybdate method 295
- Mortar bar test 451
- Mortar setting behavior 81
- Mortar 149
- Multiaxial stress 149

- Natural frequency 341
- Non-destructive evaluation 69
- Non-linear analysis 183–284
- Nondestructive evaluation 3

- Optical fiber sensors 3, 35, 69
- Optical-fiber sensors 81

- Palm oil fuel ash 367
- Paradoxes 391
- Petrographic evaluation 451
- pH 161
- Pile damage 183–284
- Piles 183–284
- Polarimetric sensors 3, 59
- Polypropylene fiber 359
- Portland cements 161
- Pozzolanic material 367
- Pre-stress 21
- Probabilistics 415
- Problems 391
- Process zone 59
- Pull-out tests 139

- Reactive aggregate 367

- Rehabilitation 427
- Reinforced plastic 351
- Reinforced concrete 3, 183–284
- Reinforcement corrosion 131
- Repeatability 451

- Salt water 351
- Seismic design 183–284
- Shear strength 359
- Silica fume 285, 295
- Silica fumes 391
- Slabs-on-grade 341
- Smart materials 3
- Smart materials and structures 69
- Soil — structure interaction 183–284
- Strain monitoring 69
- Steel fibres 139
- Steel fiber 307, 359
- Strain relaxation 21
- Strain sensor 21, 45
- Strength tests 329
- Strength 107
- Structural element testing 81
- Structural monitoring 21
- Structural damage 183–284
- Structures 427
- Sulfate resistance 161
- Synthetic fibres 139

- Tensile strength 307
- Tension softening 315
- Testing 161, 427
- Thermal analysis 295
- Thermodynamics modelling 415
- Toughness indices 329
- Toughness 107, 139, 307, 329
- Trapping mechanism 373
- Tricalcium silicate pastes 295

- Underground structures 183–284
- Uniaxial tensile strength 315
