

## Keyword Index

- 2-D digital images, 313
- AASC, 345
- AASPs, 345
- Acquisition, 133
- Admixture, 65
- Admixtures, 363
- Aerosol, 153
- Air content, 237
- Air-void distance, 247
- Air-void distances, 157
- Air-void system, 237
- Alkali-silica reaction, 485
- Anchorage shear stress, 3
- Anhydrous residues, 201
- Anisotropy, 133
- Antarctica, 227
- Area fraction, 201
- Auréole de transition, 179
- Autocorrelation function, 313
- Autogenous shrinkage, 495
- Automatic image analysis, 127, 133, 157, 247
- Backscatter images, 171, 179
- Basic creep, 495
- Binder, 381
- Blast furnace slag, 389
- Blended cement, 455, 463
- Blending, 471
- Bond strength, 381
- Boolean model, 289, 299
- Bounds, 299
- Bulk density, 65
- Ca(OH)<sub>2</sub>, 455
- Calcined clays, 441
- Calcium, 485
- Calorimetry, 455
- Carbon black, 153
- Carbon-fiber-reinforced plastic (CFRP) laminates, 3
- Cement, 157, 363
- Cement and concrete materials, 127
- Cement mill, 419
- Cement replacement material, 71
- Clinker, 207
- Co-occurrence matrices, 215
- Compatibility, 93
- Composite plate, 411
- Composites, 33
- Composition, 189
- Compressive strength, 65, 81, 111, 363, 463, 471
- Computation, 279
- Concrete, 93, 103, 215, 255, 261, 267, 353, 363, 441, 471
- Concrete beam, 411
- Concrete durability, 479
- Concrete floors, 21
- Concrete mix proportion, 71
- Configuration, 189
- Confocal microscopy, 255
- Contrast, 207
- Coupling effects, 33
- Covariance, 215
- Crack geometry, 279
- Crack propagation, 419
- Cracking, 353
- Cracks, 261
- Critical review, 21
- Crossed-covariance, 215, 289
- Curing compounds, 363
- Damage, 279
- Delamination, 33
- Densified mixture design algorithm, 375
- Dilation-counting method, 247
- Dimensional stability, 93
- Dispersion, 133, 157, 215
- Distance function method, 247
- Dry-mix shotcrete, 503
- Drying creep, 495
- Drying shrinkage, 495
- Durability, 375, 471
- EDS, 381
- Effective water/binder ratio, 71
- Efficiency factor, 71
- Energy, 65
- Environment, 363
- Evaporation, 353
- Experimental results, 71
- Extraction, 133
- Fibre composites, 389
- Fibre-reinforced concrete (FRC), 157
- Filtering, 133
- Fine aggregate, 111
- Fineness, 335
- Flow length, 237
- Fluid flow, 279
- Fly ash, 363
- Fourier transform analysis, 313
- Fractal dimension, 153, 399
- Frost resistance, 237
- Fruit, 65
- Granulometry, 133, 157
- Ground brick, 81
- Ground coarse fly ash, 335
- Guidelines, 21
- High performance concrete, 71, 375
- High strength, 375
- High-reactivity metakaolin, 479
- Homogeneity, 157
- HRM, 479, 503
- Hydration, 189
- Hydration products, 455
- Image analysis, 171, 179, 201, 207, 237, 261, 267, 299
- Image processing, 133, 255
- In situ properties, 57
- Interface model, 33
- Interfacial transition zone, 189
- Interfacial transition zone (ITZ), 171, 179
- Interground fibers, 419
- Kaolin, 471
- Layered plates, 33
- Line scanning, 227
- Low-cost construction, 389
- Magnification, 201
- Material model, 189
- Materials, 255
- Mathematical morphology, 133
- Matrix, 65
- Measurements, 133
- Mechanical performance, 389
- Mechanical properties, 47
- Mercury intrusion porosimetry, 81
- Metakaolin, 441, 455, 463, 485, 495, 503
- Microcracking, 267, 345
- Microcracks, 261
- Microscopic examination, 237
- Microscopic structures, 47
- Microstructure, 171, 179, 381
- Mineral admixtures, 71
- Minimum cement content, 71
- Mix design procedure, 71
- Model, 279
- Modelling, 133, 455
- Modulus of elasticity, 93
- Morphological parameters, 133
- Morphology, 127
- Mortar, 81, 111, 157, 471

- Natural and artificial mechanical aggregates, 313  
 'Natural concrete, 227  
 Numerical simulation, 153  
  
 Optimum water content, 71  
 Orientation, 157  
 Orientation analysis, 227  
 Oxygen diffusion, 93  
 Oxygen permeability, 93  
  
 Particle packing, 189  
 Permeability, 313  
 Picture analysis, 279  
*Pinus radiata* pulp, 389  
 Plaster, 299  
 Plastic shrinkage, 353  
 Polymer concrete, 399  
 Polymer modification, 47  
 Polypropylene fibers, 419  
 Porous media, 299  
 Porous micro-structure, 313  
 Portland cement, 455  
 Portlandite, 103, 463  
 Pozzolan, 81, 455, 471  
 Pozzolanic material, 335  
 Pozzolans, 485  
 Prestressed concrete, 21  
 Pulse velocity, 353  
  
 Quantification, 267  
  
 Random stationary model, 313  
 Recycled materials, 389  
  
 Reinforcement corrosion, 103  
 Repair, 103  
 Repair mortars, 93  
 Reuse, 111  
 Rheology, 463  
 Roses of intersections, 227  
  
 Scale effect, 399  
 Scanning electron microscopy (SEM), 171, 179  
 Segmentation, 133, 207, 267  
 Self-compacting concrete, 57  
 SEM, 299, 381  
 Serviceability, 21  
 Setting time, 463  
 Shear, 411  
 Shear-span, 3  
 Shrinkage, 93  
 Silica fume, 103, 363, 485  
 Simulation, 157, 289  
 Sirius Group, 227  
 Sisal pulp, 389  
 Skeleton by influence zone method, 247  
 Spacing factor, 237  
 Specific surface, 237  
 Spent catalyst, 111  
 Statistics, 171  
 Stereological parameters, 157  
 Stereology, 189, 261  
 Strength activity index, 335  
 Strength development, 345  
 Strengthening, 3, 411  
 Stress concentration, 411  
 Structural elements, 57  
  
 Structure-sensitivity, 189  
 Sulfate resistance, 471  
 Superplasticiser, 71  
 Surface and profile roughness ratio, 399  
 Surface of contact, 299  
  
 Thermal analysis, 455  
 Thermal conductivity, 65  
 Thresholding, 207  
 Tillite fabric, 227  
 Tilt angle of clasts, 227  
 Total creep, 495  
 Total sulfate, 463  
 Transition zone, 381  
 Type of added sulfates, 463  
  
 Uniformity, 57  
 Unsheeted length, 3  
  
 Vibration, 21  
 Voronoi tessellation, 289  
  
 Waste, 65  
 Water curing, 363  
 Water/cement ratio, 363  
 Workability, 111  
  
 Youngs modulus, 299
