

## Keyword Index

- 3D FE-analysis, 551
- Absorption, 127, 415
- AC impedance spectroscopy, 89
- Accelerated corrosion, 139
- Adhesion, 127
- Adiabatic conditions, 253
- AES, 89
- Aggregate interlock, 509
- Air-cooling, 151
- Alkali-resistant glass fibers, 223
- Alternative cementitious materials, 437
- Analytical model, 497
- Anchorage, 539
- Anodes, 101
- Applications of HPC, 243
- Ash, 219
  
- Beam, 281
- Biaxial hollow slab, 551
- Blast furnace slag, 191, 427
- Bond, 269
- Bound chloride, 1
- Bridge failures, 101
- Bridges, 169
- BubbleDeck, 551
  
- Calcium aluminate cement, 477
- Calcium nitrite, 79
- Carbon fiber composites, 457
- Carbonation, 45
- Cathodic protection, 101, 159
- Cement, 451
- Cement material, 219
- Cement paste, 467
- Cement properties, 371
- Cement-based coating, 127
- Cement-based polymer-modified coating, 127
- Chloride, 101, 427
- Chloride attack, 27
- Chloride ingress, 437
- Chloride ions, 89
- Chloride permeability, 127
- Chloride removal, 159
- Chloride threshold, 1
- Chloride-beneficiation, 305
- Chloride-induced reinforcement corrosion, 17
- Chlorides, 45, 55, 169
- Coarse aggregates, 263
- Code rules, 539
- Codes, 523
- Collapse, 523
- Column, 281
- Column footings, 491
  
- Composite cements, 191
- Compression zone, 509
- Compressive strength, 253, 269
- Concrete, 1, 35, 45, 65, 89, 119, 151, 159, 211, 317, 379, 427, 451
- Concrete deformations, 263
- Concrete fatigue, 211
- Concrete properties, 371
- Concrete structures, 169
- Concretes, 361
- Conductivity, 415
- Corrosion, 1, 35, 45, 65, 73, 79, 89, 371, 427, 451
- Corrosion in concrete, 27
- Corrosion monitoring, 65
- Corrosion potential, 89
- Corrosion processes, 73
- Corrosion rate, 27, 55
- Cover zone, 415
- Creep, 269
- Curing conditions, 253
- Current distribution, 159
- Curvature, 281
- Cyclic wetting and drying, 427
  
- Databank, 497
- De-icing salt, 427
- Degree of hydration, 253
- Depression angle, 467
- Design codes, 531
- Detailing, 539
- Deterioration, 393
- Deterioration rate, 27
- Docks, 169
- Dowel action, 509
- Ductility, 281
- Durability, 27, 415
  
- EIS, 7
- EIS technique, 35
- Electric field, 159
- Electrical characterisation, 477
- Electrical impedance spectroscopy, 457
- Electrical resistivity, 437
- Electrochemical, 89
- Electrochemical aging, 101
- Electrochemical repair, 159
- Encapsulation, 119
- Epoxy-based coating, 127
- EQCM, 7
- ESCA, 89
- Ettringite, 347, 385
- Experimental results, 497
  
- Fatigue tests, 211
- FBE coating, 73
- FE-analyses, 491
- FGD, 385
- Fiber bond-slip, 229
- Fiber-reinforced concrete, 211
- Finite element analysis, 229
- Flexural strength, 139, 229
- Fly ash, 45, 427
- Forensic analysis, 101
- Frame, 281
- Freezing, 467
- Freezing and thawing, 269
- Fully/partially prestressed beams, 229
  
- Ground granulated blast furnace slag, 437
- Gypsum, 347, 385
  
- Hannebachite, 385
- Heat evolution, 201
- Heat of hydration, 253
- High frequency measurements, 477
- High strength concrete, 509
- High strength fiber reinforced concrete, 229
- High-performance concrete, 243, 253
- High-strength concrete, 281
- High-strength/High-performance concrete, 263, 269
- Hydration, 331, 371
- Hydroxyl generation, 159
  
- Impedance, 45, 467
- Inhibitor, 35, 89
- Inhibitors, 79
- Integrity reinforcement, 531
- Intergrinding, 371
- Ion transport, 451
  
- LCTF, 347
- Lightweight concrete, 223
- Linear polarisation, 27
- Linear polarization, 89
- Load-deflection response, 229
- Loss off stability, 281
  
- Marine environment, 169
- Massive structures, 253
- Mechanisms, 305
- Membrane potential, 451
- Metakaolin, 201, 437
- Microsilica, 437
- Microsilica concrete, 101
- Modelling, 159, 451

- Modern construction, 393  
Modulus of elasticity, 263  
Moment transfer, 531  
Monitoring, 415  
Mortar, 201
- Neutral axis depth, 509  
Numerical simulation, 497
- Oxides, 7
- Partial depth fibers, 229  
Passive steel, 1  
Phase formation, 331  
Plain and blended cements, 305  
Poissons ratio, 263  
Polarization of steel, 139  
Polish experience in HPC, 243  
Polymer, 119  
Polypropylene, 119  
Polyurethane coating, 127  
Portland cement, 191  
Portland limestone cement, 371  
Portland-limestone, 351  
Prediction, 523  
Pulverised fuel ash, 191, 437  
Pulverised-fuel ash, 201  
Punching, 491, 509, 523  
Punching behavior, 551  
Punching failure, 497  
Punching shear, 539  
Punching shear resistance, 531
- Raman chemical imaging, 347  
Raman spectroscopy, 7  
RC slabs, 491  
Recycled aggregates, 269  
Redistribution of internal forces, 281  
Reinforced concrete, 17, 79, 101, 497  
Reinforcement, 45, 427  
Reinforcement corrosion, 151, 159, 169  
Reinforcements, 55  
Reinforcing bar, 101  
Reinforcing steel, 89  
Repair material, 139  
Repairs, 169  
Research on HPC in Poland, 243  
Resistivity, 427  
RHPC, 269
- Sand blasting, 139  
Saturate calcium hydroxide, 89  
Scanning electron microscopy, 191  
Shear, 523  
Shear cracking, 509  
Shear reinforcement, 497, 531, 539  
Shrinkage, 269  
Shrinkage cracking, 223  
Silica fume, 253  
Slab, 509  
Southern California, 379  
Spray dryer ash, 385  
Stainless steel, 101  
Steel bar cleaning techniques, 139  
Steel corrosion, 119  
Steel fiber composites, 457
- Steel fibers, 211  
Steel reinforcement, 35  
Steel reinforcement corrosion, 127  
Sulfate, 351, 361  
Sulfate attack, 305, 339  
Sulfate cation, 17  
Sulfate concentration, 17  
Sulfate solution, 317  
Sulfate solutions, 331  
Superplasticizer, 253
- Temperature resistance, 223  
Temperature rise, 201  
Tensile splitting strength, 269, 509  
Thaumasite, 347, 351, 361, 379, 385, 393  
Thaumasite formation, 339  
Theoretical analysis, 317  
Timber waste, 219  
Titanium, 101
- Ultimate compressive strain, 281
- Water permeability, 127  
Water quenching, 151  
Weathering, 55  
Wharves, 169
- X-ray diffraction, 191  
XRD, 339
- Zinc, 101  
Zinc oxide, 79  
Zinc-hydrogel, 101
