CONCRETE
RESEARCH**

Index to Volume 33

2003

Volume 33, Number 1

January

PAPERS

- R. Luo, Y. Cai, C. Wang, X. Huang:** Study of chloride binding and diffusion in GGBS concrete 1
- I. Aiad, A.A. Mohammed, S.A. Abo-EL-Enein:** Rheological properties of cement pastes admixed with some alkanolamines 9
- W. Yao, Z. Li:** Flexural behavior of bamboo–fiber-reinforced mortar laminates 15
- S. Goñi, A. Guerrero:** Accelerated carbonation of Friedel's salt in calcium aluminate cement paste 21
- W. Yao, J. Li, K. Wu:** Mechanical properties of hybrid fiber-reinforced concrete at low fiber volume fraction 27
- E.F. Irassar, V.L. Bonavetti, M. González:** Microstructural study of sulfate attack on ordinary and limestone Portland cements at ambient temperature 31
- G. Li, Y. Yu, Z. Zhao, J. Li, C. Li:** Properties study of cotton stalk fiber/gypsum composite 43
- P.A. Claisse, E. Ganjian, T.A. Adham:** A vacuum-air permeability test for in situ assessment of cover concrete 49
- K. Stanish, M. Thomas:** The use of bulk diffusion tests to establish time-dependent concrete chloride diffusion coefficients 57
- F.R.D. Andrade, V. Maringolo, Y. Kihara:** Incorporation of V, Zn and Pb into the crystalline phases of Portland clinker 65
- L.-H. Yu, H. Ou, L.-L. Lee:** Investigation on pozzolanic effect of perlite powder in concrete 75
- M.A. Bérubé, J.F. Dorion, J. Duchesne, B. Fournier, D. Vézina:** Laboratory and field investigations of the influence of sodium chloride on alkali–silica reactivity 79
- R. Jauberthie, F. Rendell:** Physicochemical study of the alteration surface of concrete exposed to ammonium salts 87
- J. Pavlík, V. Tydlíát, R. Černý, T. Klečka, P. Bouška, P. Rovnaníková:** Application of a microwave impulse technique to the measurement of free water content in early hydration stages of cement paste 95
- J.C. Nadeau:** A multiscale model for effective moduli of concrete incorporating ITZ water–cement ratio gradients, aggregate size distributions, and entrapped voids 105
- X. Mo, C. Yu, Z. Xu:** Long-term effectiveness and mechanism of LiOH in inhibiting alkali–silica reaction 117
- J. Hill, J.H. Sharp:** The hydration products of Portland cement in the presence of tin(II) chloride 123
- E.P. Nielsen, M.R. Geiker:** Chloride diffusion in partially saturated cementitious material 135
- H. Liang, L. Li, N.D. Poor, A.A. Sagüés:** Nitrite diffusivity in calcium nitrite-admixed hardened concrete 141

C. Dow, F.P. Glasser: Calcium carbonate efflorescence on Portland cement and building materials	149
R. Kumar, B. Bhattacharjee: Porosity, pore size distribution and in situ strength of concrete	157
DISCUSSION	
C.D. Atiş: A discussion of the paper “Very-high-performance concrete with ultrafine powders” by Guangcheng Long, Xinyou Wang and Youjun Xie	167
G. Long, X. Wang, Y. Xie: A reply to the discussion by Cengiz Duran Atis of the paper “Very high performance concrete with ultrafine powders”	169
S. Diamond: A discussion of the paper “Effect of drying on cement-based materials pore structure as identified by mercury porosimetry—a comparative study between oven-, vacuum-, and freeze-drying” by C. Gallé	171
C. Gallé: Reply to the discussion by S. Diamond of the paper “Effect of drying on cement-based materials pore structure as identified by mercury intrusion porosimetry: a comparative study between oven-, vacuum- and freeze-drying”	173

Papers Presented at the Fall 2001 Materials Research Society Symposium on Design, Characteristics and Properties of Cementitious Materials

EDITORIAL

D.E. Macphée: Fall 2001 Materials Research Society Symposium on Design, Characteristics and Properties of Cementitious Materials	175
---	------------

PAPERS

M.R. Jones, D.E. Macphée, J.A. Chudek, G. Hunter, R. Lannegrand, R. Talero, S.N. Scrimgeour: Studies using ^{27}Al MAS NMR of AF_m and AF_t phases and the formation of Friedel's salt	177
P.-K. Chang, W.-M. Hou: A study on the hydration properties of high performance slag concrete analyzed by SRA	183
H.J.H. Brouwers, R.J. van Eijk: Alkali concentrations of pore solution in hydrating OPC	191
W.J. McCarter, T.M. Chrisp, G. Starrs, J. Blewett: Characterization and monitoring of cement-based systems using intrinsic electrical property measurements	197
B. Kim, W.J. Weiss: Using acoustic emission to quantify damage in restrained fiber-reinforced cement mortars	207
G. Ye, K. van Breugel, A.L.A. Fraaij: Three-dimensional microstructure analysis of numerically simulated cementitious materials	215
P. Lura, O.M. Jensen, K. van Breugel: Autogenous shrinkage in high-performance cement paste: An evaluation of basic mechanisms	223
G. Ye, K. van Breugel, A.L.A. Fraaij: Experimental study and numerical simulation on the formation of microstructure in cementitious materials at early age	233

F.R. Zypman, C. Guerra-Vela: Characterization of heterogeneity in concrete and cement by mechanical spectroscopy	241
J.-H. Wu, W.-L. Wu, K.-C. Hsu: The effect of waste oil-cracking catalyst on the compressive strength of cement pastes and mortars	245
J.L. Plawsky, S. Jovanovic, H. Littman, K.C. Hover, S. Gerolimos, K. Douglas: Exploring the effect of dry premixing of sand and cement on the mechanical properties of mortar	255
H.W. Chandler, D.E. Macphee: A model for the flow of cement pastes	265
F.P. Glasser, S.-Y. Hong: Thermal treatment of C–S–H gel at 1 bar H ₂ O pressure up to 200°C	271
A. Palomo, J.I. López de la Fuente: Alkali-activated cementitious materials: Alternative matrices for the immobilisation of hazardous wastes. Part I. Stabilisation of boron	281
A. Palomo, M. Palacios: Alkali-activated cementitious materials: Alternative matrices for the immobilisation of hazardous wastes. Part II. Stabilisation of chromium and lead	289

PAPERS

Y.-M. Kim, J.-H. Lee, S.-H. Hong: Study of alinite cement hydration by impedance spectroscopy	299
C. Cau Dit Coumes, S. Courtois: Cementation of a low-level radioactive waste of complex chemistry: Investigation of the combined action of borate, chloride, sulfate and phosphate on cement hydration using response surface methodology	305
X. Fu, C. Yang, Z. Liu, W. Tao, W. Hou, X. Wu: Studies on effects of activators on properties and mechanism of hydration of sulfoaluminate cement	317
M. Santhanam, M.D. Cohen, J. Olek: Effects of gypsum formation on the performance of cement mortars during external sulfate attack	325
A. Lagosz, J. Malolepszy: Tricalcium aluminate hydration in the presence of calcium sulfite hemihydrate	333
M. Santhanam, M.D. Cohen, J. Olek: Mechanism of sulfate attack: a fresh look: Part 2. Proposed mechanisms	341
Y. Yuan, G. Li, Y. Cai: Modeling for prediction of restrained shrinkage effect in concrete repair	347
J. Bai, S. Wild, B.B. Sabir: Chloride ingress and strength loss in concrete with different PC–PFA–MK binder compositions exposed to synthetic seawater	353
K.-H. Kim, S.-E. Jeon, J.-K. Kim, S. Yang: An experimental study on thermal conductivity of concrete	363
B. Persson: Internal frost resistance and salt frost scaling of self-compacting concrete	373
J. Yang, G. Jiang: Experimental study on properties of pervious concrete pavement materials	381
C. Paglia, F. Wombacher, H. Böhni: The influence of alkali-free and alkaline shotcrete accelerators within cement systems: Influence of the temperature on the sulfate attack mechanisms and damage	387

J. Hu, P. Stroeven: X-ray absorption study of drying cement paste and mortar	397
A. Shvarzman, K. Kovler, G.S. Grader, G.E. Shter: The effect of dehydroxylation/amorphization degree on pozzolanic activity of kaolinite	405
R. Kumar, B. Bhattacharjee: Study on some factors affecting the results in the use of MIP method in concrete research	417
C.Y. Lee, H.K. Lee, K.M. Lee: Strength and microstructural characteristics of chemically activated fly ash–cement systems	425
K.N. Jallad, M. Santhanam, M.D. Cohen: Stability and reactivity of thaumasite at different pH levels	433
V. Deniz: A study on the specific rate of breakage of cement materials in a laboratory ball mill	439
COMMUNICATION	
S. Bhanja, B. Sengupta: Modified water–cement ratio law for silica fume concretes	447
DISCUSSIONS	
T.U. Mohammed, H. Hamada: A discussion of the paper “Relationship between the free and total chloride diffusivity in concrete” by Xinying Lu, Cuiling Li, and Haixia Zhang	451
X. Lu: Reply to the discussion by T.U. Mohammed and H. Hamada of the paper “Relationship between the free and total chloride diffusivity in concrete”	453
D. Herfort, M.D.A. Thomas, K. Scrivener: A discussion of the paper “Role of delayed release of sulphates from clinker in DEF” by Weislaw Kurdowski	455
W. Kurdowski: Reply to the discussion by Duncan Herfort, Michael D.A. Thomas, Karen Scrivener of the review paper “Role of delayed release of sulphates from clinker in DEF”	457
BOOK REVIEW	
P.W. Brown: Review of “Sulfate Attack on Concrete”: By J.P. Skalny, J. Marchand and I. Odler, Spon Press (2002), ISBN 0-419-24550-2,	459

PAPERS

Jeongyun Do, Yangseob Soh: Performance of polymer-modified self-leveling mortars with high polymer—cement ratio for floor finishing	1497
H. Toutanji, P.R. Matthewson, M. Effinger, A. Noumowe: Zero-eccentricity direct-tension testing of thermally damaged cement-based materials	1507
Takayuki Maeshima, Hiroaki Noma, Masato Sakiyama, Takeshi Mitsuda: Natural 1.1 and 1.4 nm tobermorites from Fuka, Okayama, Japan: Chemical analysis, cell dimensions, ²⁹ Si NMR and thermal behavior	1515
Flávio A. Rodrigues: Low-temperature synthesis of cements from ice hull ash	1525
David J. Corr, Paulo J.M. Monteiro, Jacob Bastacky: Observations of ice lens formation and frost heave in young Portland cement paste	1531
L. Turanli, F. Bektas, P.J.M. Monteiro: Use of ground clay brick as a pozzolanic material to reduce the alkali–silica reaction	1539
Yajun Ji, Herman Cahyadi Jong : Effects of densified silica fume on microstructure and compressive strength of blended cement pastes	1543
Bing Chen, Juanyu Liu: Effect of fibers on expansion of concrete with a large amount of high f-CaO fly ash	1549
P. Jason Williams, Joseph J. Biernacki, Jianming Bai, Claudia J. Rawn: Assessment of a synchrotron X-ray method for quantitative analysis of calcium hydroxide	1553
Leon Black, Andreas Stumm, Krassimir Garbev, Peter Stemmermann, Keith R. Hallam, Geoffrey C. Allen: X-ray photoelectron spectroscopy of the cement clinker phases tricalcium silicate and β -dicalcium silicate	1561

- J.I. Escalante-García, A.V. Gorokhovskiy, G. Mendoza, A.F. Fuentes:** Effect of geothermal waste on strength and microstructure of alkali-activated slag cement mortars 1567
- Xiaoqian Qian, Xiangming Zhou, Bin Mu, Zongjin Li:** Fiber alignment and property direction dependency of FRC extrudate 1575
- Mahmut Özacar:** Phosphate adsorption characteristics of alunite to be used as a cement additive 1583
- S.S. Potgieter, N. Panichev, J.H. Potgieter, S. Panicheva:** Determination of hexavalent chromium in South African cements and cement-related materials with electrothermal atomic absorption spectrometry 1589
- Alaettin Kılıç, Cengiz Duran Atış, Ergül Yaşar, Fatih Özcan:** High-strength lightweight concrete made with scoria aggregate containing mineral admixtures 1595
- Khandaker M. Anwar Hossain:** Blended cement using volcanic ash and pumice 1601
- T. Bakharev, J.G. Sanjayan, Y.-B. Cheng:** Resistance of alkali-activated slag concrete to acid attack 1607
- Anna Emanuelson, Staffan Hansen, Erik Viggh:** A comparative study of ordinary and mineralised Portland cement clinker from two different production units. Part I: Composition and hydration of the clinkers 1613
- Anna Emanuelson, Angel R. Landa-Cánovas, Staffan Hansen:** A comparative study of ordinary and mineralised Portland cement clinker from two different production units. Part II: Characteristics of the calcium silicates 1623
- Q.S. Li, J.Q. Fang, D.K. Liu, J. Tang:** Failure probability prediction of concrete components 1631
- Canan Tasdemir:** Combined effects of mineral admixtures and curing conditions on the sorptivity coefficient of concrete 1637
- C. Genazzini, R. Zerbino, A. Ronco, O. Batic, G. Giaccio:** Hospital waste ashes in Portland cement mortars 1643
- C.-H. Chiang, C.-L. Tsai:** Time–temperature analysis of bond strength of a rebar after fire exposure 1651
- Zhihong Wang, Yucui Han, Yuan Hua:** Research on increasing effect of solution polymerization for cement-based composite 1655
- Mine Özdemir, Neşe Uygan Öztürk:** Utilization of clay wastes containing boron as cement additives 1659
- Guozhong Li, Yanzhen Yu, Jianquan Li, Yingzi Wang, Huashi Liu:** Experimental study on urban refuse/magnesium oxychloride cement compound floor tile 1663
- Xiaohui Wang, Xila Liu:** A strain-softening model for steel–concrete bond 1669
- Sihai Wen, D.D.L. Chung:** Pyroelectric behavior of cement-based materials 1675
- Nikhil Barbare, Arun Shukla, Arijit Bose:** Uptake and loss of water in a cenosphere–concrete composite material 1681
- M.H. Zhang, C.T. Tam, M.P. Leow:** Effect of water-to-cementitious materials ratio and silica fume on the autogenous shrinkage of concrete 1687
- A.K. Minocha, Neeraj Jain, C.L. Verma:** Effect of inorganic materials on the solidification of heavy metal sludge 1695
- DISCUSSIONS**
- Mario Collepardi:** A discussion of the paper, “Influence of high temperature and low humidity curing on chloride penetration in blended cement concrete,” by J.M. Khatib and P.S. Mangat 1703
- J.M. Khatib, P.S. Mangat:** A reply to the discussion by M. Collepardi of the paper, “Influence of high temperature and low humidity curing on chloride penetration in blended cement concrete” 1705

BOOK REVIEWS

- Gunnar M. Idorn:** Cement and Concrete—Trends and Challenges. Materials Science of Concrete; by Andrew J. Boyd, Sidney Mindess, and Jan Skalny 1707
- Ivan Odler:** Dauerhaftigkeit von Beton (Durability of Concrete); by Jochen Stark and Bernd Wicht 1708

OBITUARY

- R.D. Hooton:** R.H. Mills 1713

PAPERS

- M.U.K. Afridi, Y. Ohama, K. Demura, M.Z. Iqbal:** Development of polymer films by the coalescence of polymer particles in powdered and aqueous polymer-modified mortars 1715
- Carolyn Dry, Mindy Corsaw:** A comparison of bending strength between adhesive and steel reinforced concrete with steel only reinforced concrete 1723
- Iffet Yakar Elbeyli, Emek Möröydor Derun, Jalen Gülen, Sebriye Pişkin:** Thermal analysis of borogypsum and its effects on the physical properties of Portland cement 1729
- Jingyao Cao, D.D.L. Chung:** Colloidal graphite as an admixture in cement and as a coating on cement for electromagnetic interference shielding 1737
- Isabel Baur, C. Annette Johnson:** The solubility of selenate-AFt ($3\text{CaO} \cdot \text{Al}_2\text{O}_3 \cdot 3\text{CaSeO}_4 \cdot 37.5\text{H}_2\text{O}$) and selenate-AFm ($3\text{CaO} \cdot \text{Al}_2\text{O}_3 \cdot \text{CaSeO}_4 \cdot x\text{H}_2\text{O}$) 1741
- Shih-Cheng Pan, Dyi-Hwa Tseng, Chih-Chiang Lee, Chau Lee:** Influence of the fineness of sewage sludge ash on the mortar properties 1749
- Antonio Princigallo, Klaas van Breugel, Giovanni Levita:** Influence of the aggregate on the electrical conductivity of Portland cement concretes 1755
- G. Appa Rao:** Investigations on the performance of silica fume-incorporated cement pastes and mortars 1765
- Koichiro Fukuda, Shinji Inoue, Hideto Yoshida:** Cationic substitution in tricalcium aluminate 1771
- B. Uzal, L. Turanli:** Studies on blended cements containing a high volume of natural pozzolans 1777
- T.D. Gunneswara Rao, D. Rama Seshu:** Torsion of steel fiber reinforced concrete members 1783
- R. Siauciunas, A. Baltusnikas:** Influence of SiO_2 modification on hydrogarnets formation during hydrothermal synthesis 1789
- Wu-Jang Huang, Suey-Chun Chu:** A study on the cementlike properties of municipal waste incineration ashes 1795
- T. Matusinović, J. Šipušić, N. Vrbos:** Porosity–strength relation in calcium aluminate cement pastes 1801
- P.J. Tumidajski, P. Xie, M. Arnott, J.J. Beaudoin:** Overlay current in a conductive concrete snow melting system 1807
- J.W. Phair, J.C. Schulz, W.K. Bertram, L.P. Aldridge:** Investigation of the microstructure of alkali-activated cements by neutron scattering 1811
- K. Shomglin, L. Turanli, H.-R. Wenk, P.J.M. Monteiro, G. Sposito:** The effects of potassium and rubidium hydroxide on the alkali–silica reaction 1825
- Pai-Huang Shih, Juu-En Chang, Li-Choung Chiang:** Replacement of raw mix in cement production by municipal solid waste incineration ash 1831
- Amir Elsharief, Menashi D. Cohen, Jan Olek:** Influence of aggregate size, water cement ratio and age on the microstructure of the interfacial transition zone 1837

Caijun Shi, Shunfu Hu: Cementitious properties of ladle slag fines under autoclave curing conditions	1851
C.S. Poon, X.C. Qiao, Z.S. Lin: Pozzolanic properties of reject fly ash in blended cement pastes	1857
J. Lanas, José I. Alvarez-Galindo: Masonry repair lime-based mortars: factors affecting the mechanical behavior	1867
Rafat Siddique: Effect of fine aggregate replacement with Class F fly ash on the abrasion resistance of concrete	1877
J.I. Escalante-Garcia: Nonevaporable water from neat OPC and replacement materials in composite cements hydrated at different temperatures	1883
Hyun-Soo Lee, Jae-Yong Lee, Myoung-Youl Yu: Influence of iron oxide pigments on the properties of concrete interlocking blocks	1889
COMMUNICATION	
Jeffrey J. Thomas, Hamlin M. Jennings: Changes in the size of pores during shrinkage (or expansion) of cement paste and concrete	1897
DISCUSSIONS	
M. Mouret, M. Cyr: A discussion of the paper "The effect of measuring procedure on the apparent rheological properties of self-compacting concrete" by Mette R. Geiker, Mari Brandl, Lars N. Thrane, Dirch H. Bager and Olafur Wallevik	1901
Mette R. Geiker, Mari Brandl, Lars N. Thrane, Dirch H. Bager, Olafur Wallevik: Reply to the discussion by M. Mouret and M. Cyr of the paper "On the effect of measuring procedure on the apparent rheological properties of self-compacting concrete"	1905
William Hime, Lisa Backus: A discussion of the paper "Redefining cement characteristics of sulfate-resistant Portland cement" by Paul J. Tikalsky, Della Roy, Barry Scheetz and Tara Krize	1907
P.J. Tikalsky, D. Roy, B. Scheetz, T. Krize: Reply to the discussion by W. Hime and L. Backus of the paper "Redefining cement characteristics of sulfate-resistant Portland cement"	1909
