|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Michael Siegwart, John F. Lyness, Brian J. McFarland:</b> Change of pore size in concrete due to electrochemical chloride extraction and possible implications for the migration of ions                                           | <b>1211</b> |
| <b>J.H. Potgieter, S.S. Potgieter, R.I. McCrindle, C.A. Strydom:</b> An investigation into the effect of various chemical and physical treatments of a South African phosphogypsum to render it suitable as a set retarder for cement | <b>1223</b> |
| <b>Ismail Aiad:</b> Influence of time addition of superplasticizers on the rheological properties of fresh cement pastes                                                                                                              | <b>1229</b> |
| <b>Seong-Tae Yi, Jin-Keun Kim, Tae-Keun Oh:</b> Effect of strength and age on the stress–strain curves of concrete specimens                                                                                                          | <b>1235</b> |
| <b>Remzi Şahin, Ramazan Demirboğa, Habib Uysal, Rüstem Gül:</b> The effects of different cement dosages, slumps and pumice aggregate ratios on the compressive strength and densities of concrete                                     | <b>1245</b> |
| <b>Guangren Qian, Darren Delai Sun, Joo Hwa Tay:</b> Characterization of mercury- and zinc-doped alkali-activated slag matrix: Part I. Mercury                                                                                        | <b>1251</b> |
| <b>Guangren Qian, Darren Delai Sun, Joo Hwa Tay:</b> Characterization of mercury- and zinc-doped alkali-activated slag matrix: Part II. Zinc                                                                                          | <b>1257</b> |
| <b>A.M. Boddy, R.D. Hooton, M.D.A. Thomas:</b> The effect of the silica content of silica fume on its ability to control alkali–silica reaction                                                                                       | <b>1263</b> |
| <b>Maria S. Konsta-Gdoutos, Surendra P. Shah:</b> Hydration and properties of novel blended cements based on cement kiln dust and blast furnace slag                                                                                  | <b>1269</b> |
