Available online 24 June 2008

The publisher regrets that an incorrect version of Fig. 1 was printed in the above article. The correct figure is now reproduced below.

Fig. 1. Powder X-ray diffraction patterns for $(\text{Sr}_{1-x}\text{RE}_x)_{n+1}\text{Ti}_n\text{O}_{3n+1}$ ($n = 1$ or 2 , RE : La or Nd, $x = 0.05$ and 0.1). Lattice parameters and volumes evaluated by least square method are also shown.
